Webinar Catalog for Early Learning Educators (Pre-K - 2)

Global Learning: Literacy and Social Studies with Molly of Denali and Let's Go Luna!
Topics: Informational Text and Literacy
Time: 60 minutes

In this webinar, early learning educators will learn how to take their students on a journey across the world without even leaving the living room. The webinar features content from PBS KIDS shows Molly of Denali and Let’s Go Luna! The training will highlight concepts of informational text and indigenous customs, as well as international travel and traditions. The webinar will provide videos, games, lessons and activities that will encourage early learners to deepen connections to their communities and establish curiosity and appreciation for other cultures across the world.

Household Curiosity: Science Inquiry and Engineering Design at Home
Topics: Science Inquiry and Engineering Design
Time: 60 minutes

In this webinar, early learning educators will learn how to engage their students in the process of science inquiry and the engineering design process using materials they can find at home. Educators will engage with STEM-related PBS KIDS content to foster curiosity and experimentation, as well as making observations and designing solutions. Through watching videos, playing games and completing activities, early learners will understand that science and engineering can be both accessible and enjoyable.

Joyful Math Time: Fun and Engaging Math Concepts with Peg + Cat and CyberChase
Topics: Early Math
Time: 60 minutes

In this webinar, early learning educators will learn how to enrich daily home life with math concepts with the help of PBS KIDS shows like Peg + Cat and CyberChase. The webinar will highlight the presence of math in daily life to help parents gain confidence and feel empowered to support math learning at home in fun, engaging ways. The webinar will cover concepts like geometry (shapes), counting and cardinality, measuring and grouping. Educators will be able to access digital content, videos and games that encourage early math practices, as well as accessible lesson plans and activities for families to do at home.
Navigating the Digital World with Early Learners: Social Emotional Learning

**Topics:** Social Emotional Learning (SEL)

**Time:** 60 minutes

In a time when screen time and school time are synonymous, it is important to find ways to understand how to continue early childhood development in a healthy, balanced way. The webinar will present research on social-emotional learning in challenging times, highlighting tips for screen time, and offering at-home activities that foster emotional development and physical education. This webinar will equip early learning educators with the tools to support families at home through PBS KIDS videos, games, lessons and activities.

Introduction to Media and Technology Integration for Early Learning Educators

**Topics:** Media and Tech

**Time:** 30 minutes

In this 30-minute webinar, early learning educators will learn 10 tech tools that can be used for creation. We will highlight how educators can use the different apps for instruction purposes and how students can use the apps for assessment of learning. We will share resources where teachers can find how-to-guides for the tools, examples of use for teacher and student, and sample projects to get their creative juices flowing.

Integrating Technology with Science, ELA, and Math and Fun!

**Topics:** Science, Math, ELA, and Media/Tech

**Time:** 60 minutes

In this webinar, early learning educators will learn how to combine Technology with Science, Math, and ELA and hands-on activities that are easy for parents to supervise and lead at home. The webinar will highlight PBS offerings like PBSLearning "Seed to Flower," PBS KIDS game "Ready, Set, Grow," and "Nature Bingo." Hands-on activities include growing a seed in a bag and creating a recycled notebook. The technology tool we will focus on for this project is Chatterpix, a free simple video creation tool that brings pictures to life! At the end of this webinar, early learning educators will be able to create their videos and teach parents how to use all of these tools to help their children learn and grow!
Integrating Technology with Social Studies and Writing: Community Helpers and Virtual Thank Yous

**Topics:** Social Studies, Writing, and Media/Tech

**Time:** 60 minutes

In this webinar, early learning educators will learn how to combine Technology with Social Studies and ELA in easy at-home projects. The webinar will highlight the PBS Series Meet The Helpers. Students will use their artistic skills to create a community helper picture. The technology tool we will focus on for this webinar is PicCollage, a free collage-maker that will enable kids to create virtual postcards. At the end of this webinar, early learning educators will be able to create PicCollage postcards and teach students and parents to use this simple technology to share their learning.

Intro Webinar: At-Home Resources for Continued Distance Learning

**Topics:** PBS LearningMedia, PBS KIDS resources

**Time:** 30 minutes

This intro webinar provides an overview of PBS SoCal's At-Home Learning resources, PBS LearningMedia, and other PBS KIDS resources for early learning educators.
